EDUCATION

Universitat Autònoma de Barcelona

Ph.D. in Electrical and telecommunication engineering | 2021 – 2024

Tashkent University of Information Technologies

M.Sc. in Telecommunication engineering | 2015 – 2017

Tashkent University of Information Technologies

B.Sc. in Telecommunication engineering | 2011 – 2015

SKILLS

Programming: MATLAB, Python

Research Tools: LaTeX

Languages: English, Spanish

PERSONAL INFORMATION

- Date of Birth:** 19 May 1991
- Hobbies:** Football, Traveling

RESEARCH EXPERTISE

My research expertise focuses on Next-Generation Satellite Systems, specifically integrating LEO constellations with IoT ecosystems. I specialize in multi-objective optimization for regional link design to enhance broadband connectivity and large-scale Satellite-IoT (S-IoT) applications. My work advances resilient network architectures that drive digital inclusion and smart infrastructure in the New Space Era.

WORKING EXPERIENCE

• Associate Professor

Department of Telecommunication Engineering,
Urgench State University | 2025 – Present

• Associate Professor

Department of Telecommunication Engineering,
Urgench Branch of TUIT | 2024 – 2025

• Doctoral Researcher

Telecommunications and Systems Engineering,
Universitat Autònoma de Barcelona | 2021 – 2024

• Senior Lecturer

Department of Telecommunication Engineering,
Urgench Branch of TUIT | 2020 – 2021

• Assistant Teacher

Department of Telecommunication Engineering,
Urgench Branch of TUIT | 2017 – 2020

SELECTED PUBLICATIONS

- B. Samandarov** & A. Vázquez-Castro (2024). Design Tradeoffs of a Regional LEO System for Emerging New Space Integrated Services. IEEE IHTC, Bari, Italy.
- B. Samandarov** & A. Vázquez-Castro (2023). Quantum Advantage of Binary Discrete Modulations for Space Channels. IEEE Wireless Communications Letters, 12(5), 903–906.

PROJECTS

PhotSat: European Union NextGenerationEU (PRTRC17.II) & Generalitat de Catalunya, 2022-2024, Satellite communication and integrated services for New Space applications.
